## Installation

To install the route with all scenarios, copy the "RailWorks" folder provided. Then find your train simulator install directory. If you are unsure of where this is then open the steam application. Then go to your library and locate train simulator. You should now see the screen which you can launch the game from as shown in figure 1.

Figure 1

Click the gear icon highlighted in red on figure 1 then hover over "manage" and select "browse local files". Your "RailWorks" folder should now have opened. Now go back to your common folder by clicking on the highlighted area shown in figure 2.

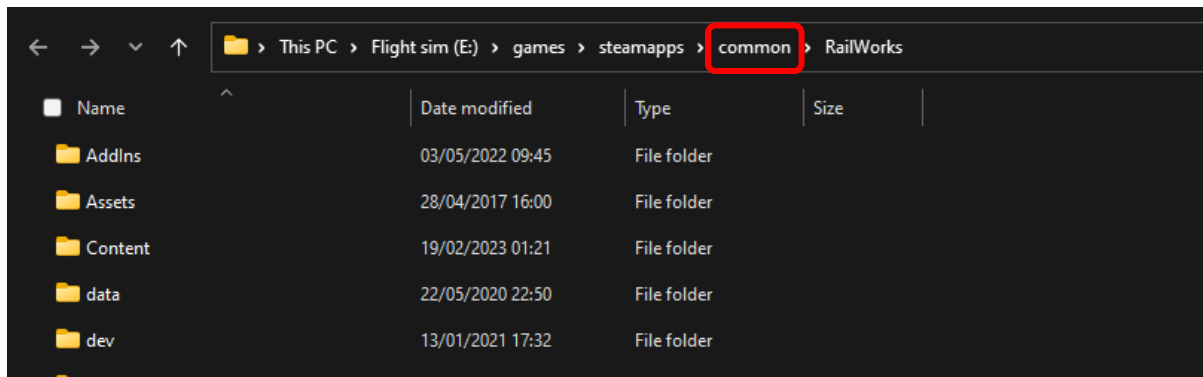

Figure 2

Now you are in your steam directory paste the “RailWorks” folder you copied earlier into here. As long as all requirements are met then the scenarios should load.

## Scenarios

The route comes with 3 scenarios and can be found under “GEML with IETs and HSTs” in either standard or free roam scenarios. You could also use quick drive however the route itself hasn’t been modified from the default GEML except for a water point for steam trains in the Ilford depot.

## Free roam

It has 1 free roam scenario for those who like to drive around, in free roam there are no limitations. You are allowed to drive any train you see including those in the Ilford depot in the buildings. The only no driveable train is a class 43 located at Ilford depot which is formed of 2 power cars and no coaches. And is display only.

## Part 1 - Ipswich to Liverpool Street

This is a standard scenario from Ipswich to Liverpool street. You are provided a GWR class 800. You will follow a class 90 out of Ipswich and pass many other trains along the way. When you arrive in Shenfield you will be greeted by a 321 who will overtake you. You will then chase the yellows into Liverpool street.

Your route is an express passenger service stopping at Colchester, Shenfield, Stratford and London Liverpool Street.

## Part 2 – Liverpool Street to Ilford Depot

Your job is to drive the GWR class 800 from the previous scenario to the Ilford depot for another driver to take the train back to where it belongs at the North Pole depot situated on the Great Western main line near Paddington. It is very late in the day so you will have loads of trains trying to get in and out of Liverpool street and you will be following a class 321 the whole way to Ilford depot. You will also pass many trains on the way into Liverpool Street.
